Examiner's Amendment

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ronald Greigg on 06/21/2005.

The application has been amended as follows:

The following changes to the drawings have been approved by the examiner and agreed upon by applicant:

- Applicant agreed to add figure 1 from U.S. Patent 4450828 of the tank being hoisted into the truck.
- Applicant agreed to add the reference character "2" to the phantom line through the rear aperture in figure 1 to show where the cross-sectional view of figure 2 was taken.

In order to avoid abandonment of the application, applicant must make these above agreed upon drawing changes.

Reasons For Allowance

The following is an examiner's statement of reasons for allowance: An apparatus and process of using a double-walled grease collection tank for use in a waste grease collection system including a truck-mounted grease transport tank, means for handling and dumping individual on-site grease collection tanks into the truck grease transport

Art Unit: 3749

tank, and an intermediate stage heating bath into which the double-walled vessel collection tank is deposited temporarily to liquefy grease in contact with the inner surfaces of the collection tank in order to facilitate dumping the contents thereof wherein the double-walled grease collection tank has an inner container portion defined by an inner bottom wall and integrally joined upwardly extending inner sidewalls, an outer container portion defined by an outer bottom wall and integrally joined upwardly extending outer sidewalls, the inner container portion being received in the outer container portion with the bottom walls and sidewalls of the inner and outer container portions being disposed in opposed spaced relation to define an open space there between, flange means rigidly joining said inner and outer container portions at or near a top portion of their respective sidewalls, at least one fill opening formed in at least one of the sidewalls of said outer container portion adjacent its bottom wall, at least one vent opening in the double-walled collection container near its top portion, and fill opening closure means removably mounted in each of at least one opening for closing and sealing the opening.
